Empirical Falsification of NRA3 as a Non-Recombinant Alignment
Demonstrating Massive Incompatible Site Density, Sister Taxon Switching, and Statistical Topology Rejection

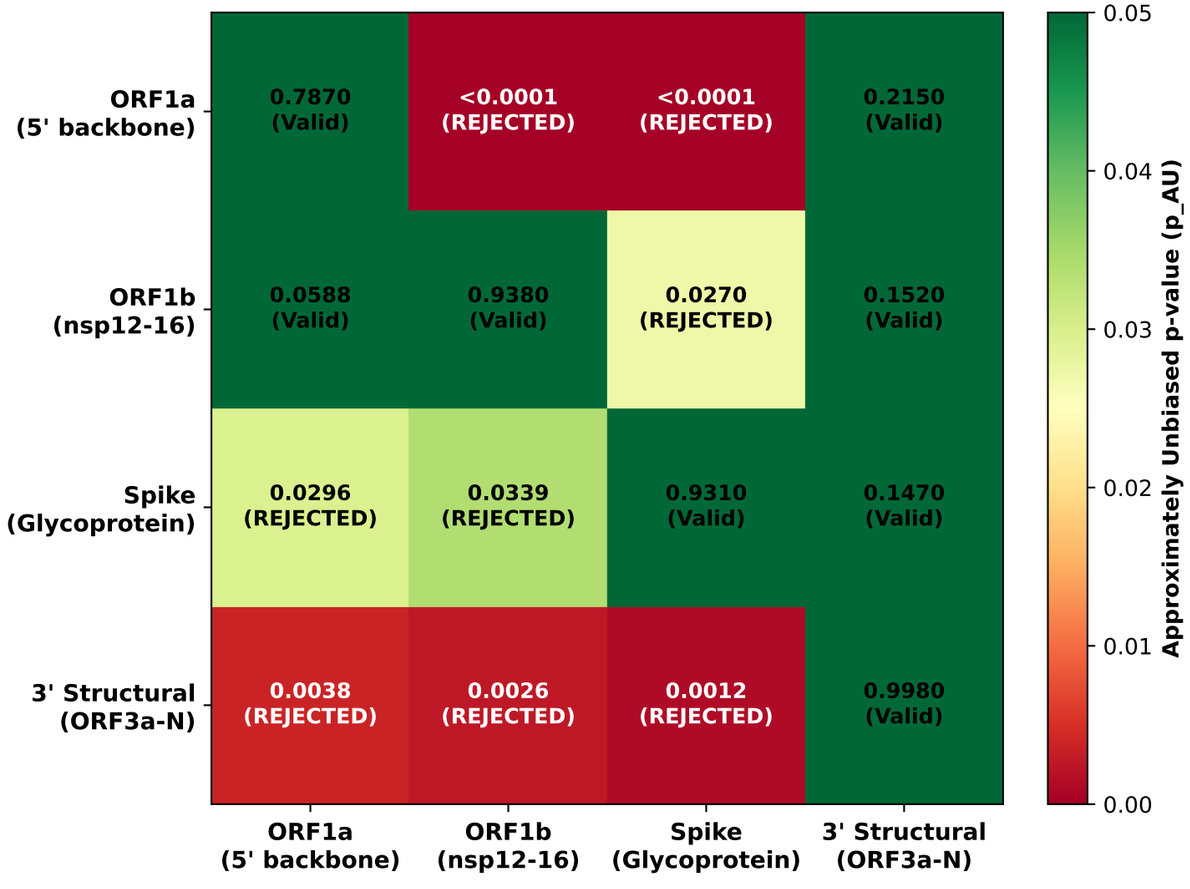

A. Four-Gamete Incompatibility Across NRA3 Blocks
(Pervasive Reticulation Across Putative Clonal Alignment)

B. SARS-CoV-2 Sister Lineage Switching Across NRA3 Blocks
(Complete Break Between ORF1ab and Spike Ancestry in 78-Taxa)

C. 68-Taxon Dataset: Mutual AU Topology Rejection Matrix
(Statistical Incompatibility Between Constituent NRA3 Domains)

D. 78-Taxon Dataset: Mutual AU Topology Rejection Matrix
(Total Rejection of Shared Tree Topology Across Updated Partitions)
